Solon Community School District Parents, Students and Community,

Over the course of the last three days the Solon High School football coaches and administration have been working together with the Union CSD to identify what was said during the Friday night football game in LaPorte City on September 11th, 2020. Many things were shared via social media that needed to be addressed.

Union football coaches and administrators were made aware that inappropriate statements were directed toward Union football players. After hours of communication with Union coaches and administration, we were able to get to the bottom of what was said on the field that evening. Solon High School, along with its football program does not tolerate any type of behavior that condemns, belittles, or treats others in a way that represents our school or community in a negative way. We have addressed the inappropriate language that was used on the field that evening.

We want to express our sincere gratitude for the way Union handled the accusations. Their coaching staff and administration reported everything to us immediately so we could begin our investigation.

If you have any questions or additional concerns, please reach out to Mr. Hack or Mr. Wigle.

Sincerely,

Zach Wigle

Zach Wigle

Solon High School Principal
